

Hubble Space Telescope

(1973~2035)

Webb Space Telescope

(1996~2040)

Giant Magellan Telescope

(2000~2150⁺)

- The Giant Magellan Telescope (GMT) is being built for the next 125⁺ years!

The Giant Magellan Telescope (GMT) is being built for the next 125⁺ years.

- The project is too large to be built by a single university or country.

ASU made an initial GMT investment in 2017. With Hubble and Webb winding down in the 2030's, we need to plan what ASU's can invest, so our students (incl. on-line) may use GMT and its data through the mid-2100's.
